**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Sonntag et al (5,780,981).

As per claim 1, Sonntag discloses:

- determining a performance setpoint value for the electric drive motor from an accelerator pedal position (column 2, lines 59-65); and
- making a power request to the power-generating system before a torque request to the drive motor (column 3, line 14-25);
- wherein the accelerator pedal movement is additionally used to calculate the performance setpoint value (column 4, lines 14-20).

As per claim 11, Sonntag discloses a fuel cell system as a power-generating system (abstract).

3. Claim 1 rejected under 35 U.S.C. 102(b) as being anticipated by Adler et al (5,533,583).

As per claim 1, Adler discloses:

- determining a performance setpoint value for the electric drive motor from an accelerator pedal position (column 7, lines 22-28); and

Art Unit: 3661

- making a power request to the power-generating system before a torque request to the drive motor (column 8, line 60-65);
- wherein the accelerator pedal movement is additionally used to calculate the performance setpoint value (column 7, lines 45-50).

***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 2 and 5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As per claims 2 and 5, how is the setpoint torque established?

***Allowable Subject Matter***

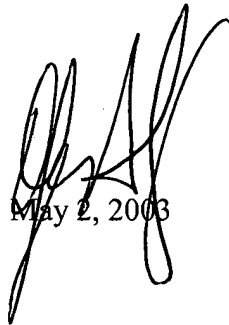

6. Claims 3, 4, 6-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
